TECHNOLOGIES

# *Power in Mind*

**OPAL-RT**  
**TECHNOLOGIES**

*From Imagination  
to Real Time*

**Discover the cutting-edge world of real-time simulation** and Hardware-in-the-Loop (HIL) testing with OPAL-RT. Engineers and researchers gain accessible, customized technology to accelerate product development and enhance energy transmission reliability.

Our power systems product line covers fast electromagnetic phenomena to large power system transient stability. Power systems experts innovate, optimize security, efficiency, and performance, ensuring robust protection for power grids.

OPAL-RT offers integration services, consulting, and training to transform your innovative ideas into reality. Utilizing our portable, high-end simulators, we perform HIL tests on-site or in laboratories, guaranteeing precise control and protection system evaluations.

**HARDWARE IN THE LOOP (HIL)**

**TEST & MEASUREMENTS**

**POWER HARDWARE IN THE LOOP (PHIL)**

**RAPID CONTROL PROTOTYPING (RCP)**
